Q1-2 2019

Public consultation on draft 3.0

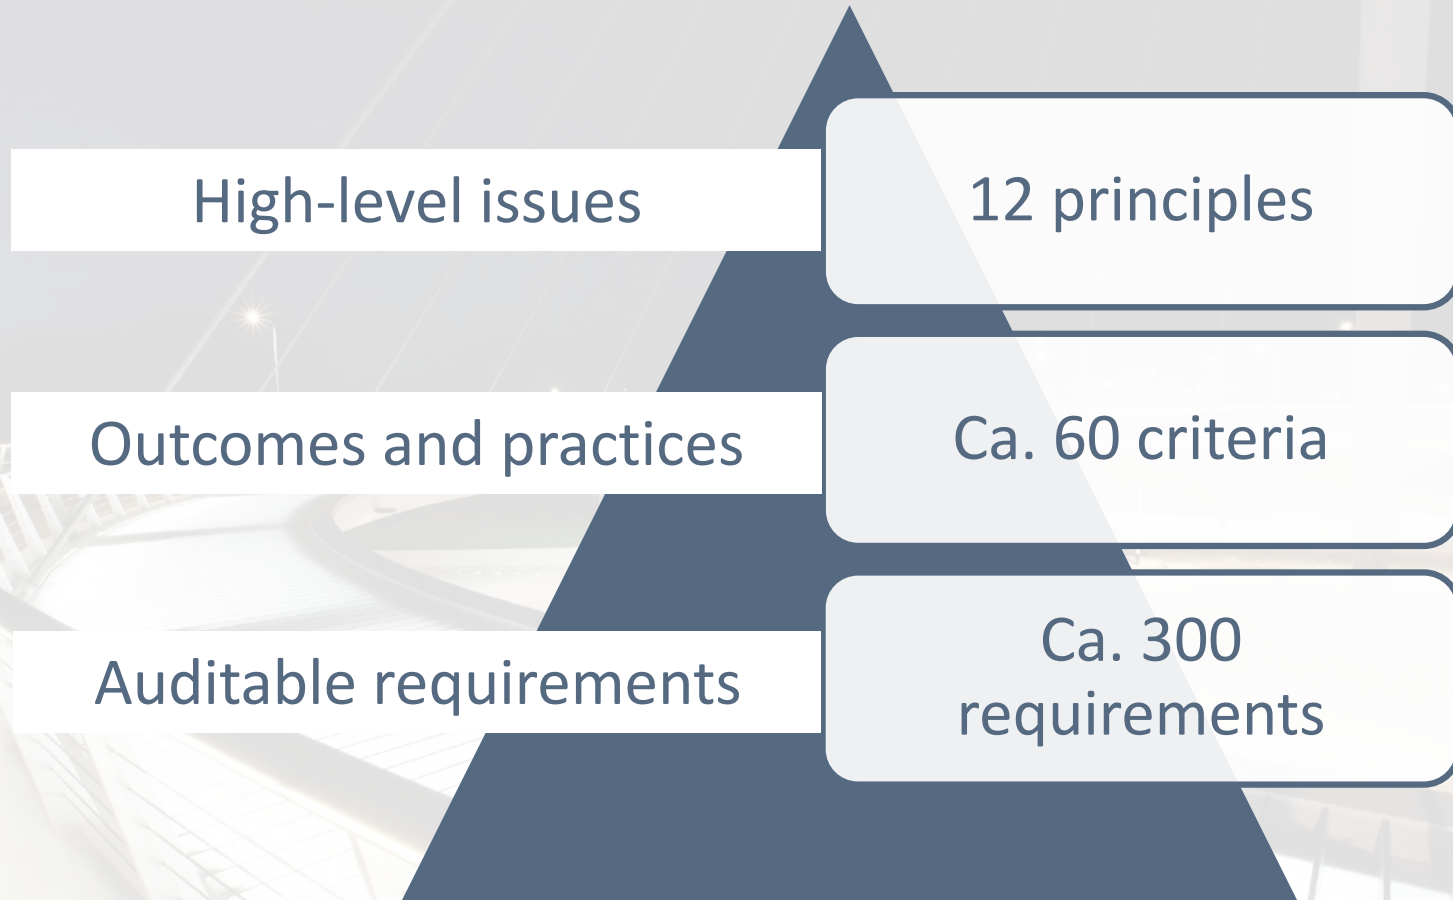

Q2-3 2019

Membership approval and Board ratification of draft 4.0

Q4 2019

First audits and certifications?

Draft standard 3.0 structure

12 principles

1. Business Integrity
2. Management Systems
3. Stakeholder Communication and Engagement
4. Responsible Sourcing
5. Climate Change and Greenhouse Gas Emissions
6. Emissions, Effluent, Waste
7. Water Stewardship
8. Biodiversity
9. Human Rights
10. Local Communities
11. Labour Rights
12. Occupational Health and Safety

Aim is to be open to all committed steelmakers

How do we achieve this?

- Tiered approach that acknowledges that some issues are very challenging (Sourcing and GHG)
- Continued improvement to be brought about by market and civil society demand, peer pressure, etc.

Aim is to be open to all committed steelmakers

Consultation on standard open until 11 April

**We would very much like to hear your views
on draft standard 3.0**
